Office of the Special Revenue Officer,
M.I.Scheme, Kadur and Hassan Districts,

No. H. Camp.

Dated, Camp: Hassan, 18th February 1917.

Enclosures-Three.

From

R. Nanaswamy Rao, Esquire,
Special Revenue Officer, M.I.Scheme,
Kadur and Hassan Districts, Chikmagalur:

To

D.M.Narasinga Rao, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
General Department, Bangalore:

Sir,

Jan 18-16-4

I have the honor to submit, herewith, a report on the progress of measures undertaken under the Malnad Improvement - Scheme in the Kadur and Hassan Districts for the Half year -- ending 31st December 1916. together with statistical statements showing the details of progress of works in the two districts.

I have the honor to be

Sir,

Your most obedient servant,

R Nanaswamy Rao

Special Revenue Officer,
M.I.S.Kadur & Hassan Dists.

GPB—50,000—17-9-15

From The Special Revenue Officer,
M.I.Scheme, Kadur & Hassan Districts,
Chikmagalur:

To The Secretary to the Government
of Mysore, General Department, Bangalor

Dated Camp:Hassan, 18th
Despatched 19th February 1917.
Received
General No. H.
No.
Enclosure No. Three only

Submits half yearly report on the progress of measures undertaken under t M.I.Scheme in the Kadur and Hassan Dis tricts for the half year ending 31st December 1916

A report on the Progress of measures undertaken under the Malnad Improvement Scheme in the Kadur & Hassan District for the Half year ending 31st December 1916.

-----&-----

Area under the sphere of operations:

The number of villages in the Hassan District continued to be the same during the half year under report, viz., 928 villages with a population of 1,61,812 as per figures of the Census of 1911, whereas the number in the Kadur District was increased by 58 villages with a population of 17,280 by the inclusion of Sakrepatna Hobli of the Kadur Taluk under Government Order No.3580-6/San.81-15-4, dated 2nd December 1916, thus raising the total number of villages in the Kadur District under the Scheme to 587 with a population of 1,90,864.

2. District Committees and their meetings:

As per provisions of Government Order No.3322-33/San. 39-15-2, dated 3rd November 1915, the strength of the District Committee was raised to 14 members. The number of non-Official members of the Kadur District Committee was increased from 3 to 4.

Three meetings of each of the two District Committees were held during the period under review and the average attendance of members and the number of subjects brought up for discussion were 10 and 14 in the Kadur District and 12 and 13 in the Hassan District respectively.

3. Agency and Staff:

There was no change in the direction and control, and the Executive Staff consisted of two Overseers on Rs.70/- and a Special Overseer under the old scale on Rs.40 plus 15 in the Kadur District and only one Overseer on Rs.70/- and a Sub Overseer on Rs.30 plus 15/- in the Hassan District. Owing to the paucity of duly qualified Assistant Sanitary

Inspectors, the full complement of the Sub Overseers was not employed in both the Districts and the proposals of the Committees to employ candidates trained in the Mysore Engineering School as Sub Overseers in preference to persons trained in mere Sanitation have been submitted to and are now under the consideration of Government.

I. S A N I T A T I O N:

4. Clearance of Rank Vegetation, etc.

(a). At the cost of Government: A small grant of Rs.25/- was sanctioned as a special case by the Kadur District Committee to Tadasa village in the Narasimharajapur Sub Taluk and the Deputy Amildar was required to get the villagers to turn out an equal amount of work. No fresh works at the cost of Government were sanctioned in the Hassan District.

A sum of Rs.35-12-0 was paid out of Government funds towards the works sanctioned during the previous year in the Kadur District and the remaining portion of the works shown in the accompanying statement as sanctioned and undertaken under the Scheme in the previous year in both the Districts was ordered by the respective Deputy Commissioners and Chairmen to be carried out by the villagers themselves or under the Village Improvement Scheme, and needful instructions were issued to the Amildars in the matter.

(b). By the villagers without any cost to Government:

Endeavours were continued to be made to induce the ryots to clear rank vegetation [redacted], both in and around their villages without any cost to Government. During the month of November and December when the monsoon was practically over the villagers were able to attend to the work under the head and clear about 231 acres in 67 villages in the Hassan District and about 198 acres in 53 villages in the Kadur District of rank vegetation, [redacted], in the village sites as also to some extent in their hiduvali lands. The value of work thus turned out by the villagers in the Kadur and Hassan Districts during the half year under report is esti-

estimated roughly at Rs.2,376/- and Rs.2,610/- respectively. A much larger area than that covered by the above figures has actually been cleared of rank vegetation notably in the Chikmagalur and Mudigere Taluks in the Kadur District as also in the Belur Taluk of the Hassan District. As it is no possible to receive an accurate account of lands so cleared the total acreage cannot unfortunately be given. Several darakhasts under the Lantana Rules of 1910 for lands overgrown with lantana have also been received and are being attended to in the Revenue Department in the two districts.

5. Providing good drinking water:

(a). Sinking new wells: During the half year under report in the Kadur and Hassan Districts 17 and 16 fresh wells were sanctioned respectively with estimates amounting to Rs.8181/ and Rs.8327/-. Owing to the early commencement and late continuance of the monsoon this year, it was not possible to start the well works earlier than in December. They were however started in December and the incomplete works of the previous years were also completed. The details of progress of all the works including the incomplete works of the previous years have been given in the enclosed statement.

(b). Improvement to existing wells:

Four new works under the head were sanctioned during the half year in the Kadur District with an estimated cost of Rs.702/-. Of these, three were already completed. The progress of these works as also of those of previous years is given in the annexed statement.

(c). Larger Water Supply Projects:

Of the four Water Supply Projects referred to in the previous half-yearly report, the Kalasa Water Supply Project is being carried out by the Public Works Department and the Indavara Water Supply Scheme was sanctioned and undertaken for execution during the period under report. The strengthening of the tank bund is being attended to and an expenditure of Rs.157-13-6 was incurred during the period under report.

It was found that the Sollebyle Water Supply Project could not be undertaken owing to the drainage of certain -- coffee.estates contaminating the hulla which was intended to be used for supplying water to the village. As an alternative Scheme, the present Deputy Commissioner ordered that investigation and suggestion be made to augment the present sourse of water supply which comes in pipes to the Travellers Bungalow. The project is not likely to cost much and efforts will be made to carry out the same during the coming hot weather.

The further investigation of the Balehonnur Water Supply project was not undertaken as the promised amount of contribution from the villagers was not more than Rs.600/- while the cost of the scheme was likely to be more than Rs.5,000/-.

A Water Supply Scheme for Koppa is ripe for execution by the Public Works Department.

6. Timber Facilities for House-building:

20 applications from the villagers of Mallipatna, Chowlgere, Siradamahalli and Magodu in the Arkalgud Taluk and about five from the villagers of Kambikallahalli in the Chikmagalur Taluk and 30 from the villagers of Lukvalli Tarikere Taluk were received for free grant of timber and are being disposed of. 98 applications for grant of timber at half the seigniorage rates were received and disposed of during the period under report in the Kadur District by the Amildars and the Frest Range Officers and 32 were similarly received and dsiposed of by the Amildars of Manjarabad abd Belur Taluks in the Hassan District. The amounts realised by these applications are reported to be approximately Rs.1,090/- in the Kadur District and Rs.283-8-in the Hassan District during the period under report.

7. Improvement of Drainage:

During the half year under report, the number of fresh works under the head sanctioned and undertaken in the Kadur and Hassan Districts is 12 and 9 respectively with

estimates amounting to Rs.1,675/- and Rs.824/-. All the works in both the Districts were put in hand and three out of the twelve newly sanctioned works in the Kadur District are already completed and the remaining ones are reported to be fairly progressing. In the Hassan District, more than half the portion of the works which have all been started is reported to have been completed though bills in respect of them have not been yet presented by the contractors. The progress of the newly sanctioned works as also of some incomplete works of previous years in the two districts -- during the period under review is shown in the accompanying statement.

8. Shifting of villages:

In the Kadur and Hassan Districts, 14 & 18 villages were dealt with in all under the head from the commencement of the Scheme till the end of December 1916 and several of the records relating to the acquisition or alienation proceedings have been completed and are under various stages of progress. The number of villages successfully and completel shifted to better localities upto the end of December 1916 in the two districts is 6 and 7 respectively.

9. Removal of cultivation away from residential areas:

(a). Number of villages where wet cultivation has been prohibited for a certain distance all round:

The question of prohibition of wet cultivation around the villages not having met with the approval of the Distric Committees on the ground that it deprived the villagers of the Malnad parts of the very means of livelihood and caused the loss of assessment to Government, recourse was had to shift the low-lying living quarters away from the neighbouring paddy flats to elevated sites and to extend the village building sites.

(b). Extension of Villages:

Since the commencement of the Scheme, 17 and 20 villages were dealt with under the head and in 10 village in the Kadur District and in 6 in the Hassan District, ex

extensions have been successfully laid out and the people are already constructing houses in the selected new sites. As regards the remaining villages, the records relating to the acquisition or alienation of the lands selected for extensions have been submitted and necessary sanction of Government is awaited.

10. Providing separate sheds for cattle away from human dwellings:

Particular attention is being paid in all cases of newly constructed houses both in the extensions and newly shifted villages to get the people to build separate cattle sheds apart from residential quarters. Steps are also being taken even in the case of existing houses to induce the owner to remove cattle sheds farther away and this is reported to have been carried out in 15 and 9 villages in the Hassan and Kadur Districts respectively.

Action is also being taken to have manure dumped at a distance from the village proper and suitable land is being provided for the purpose in places where there is none at present.

11. Number of villages to which the Village Sanitary Rules have been extended:

At the recommendation of the Hassan District Committee, the Village Sanitation Rules were introduced into all the villages coming under the sphere of operations of the Malnad Improvement Scheme, irrespective of the number of houses therein as per sanction of Government in their Order No.4091-6/Med.24-13-134, dated 20th November 1914. The number of villages in which the Village Sanitation Rules were introduced, therefore, is 587 in the Kadur District and 928 in the Hassan District.

12. Model villages and Houses:

Originally, the District Committees intended to select half a dozen insanitary villages in each District and shift them to healthier localities for being made into model villages, but subsequently, when several vil-

villages, besides those selected, had to be dealt with in improving their sanitary condition, the idea was kept in view to lay out every newly formed village or extension on the plan of model villages and to get the houses built therein on approved plans and designs.

Proposals were also made at the Central Committee meetings that some houses should be constructed in some of these villages at the cost of Government as models for the villagers and the Government in Order No.2082-5/San.52-15-4 dated 23rd September 1916, sanctioned the construction of five houses in the Kadur District and three in the Hassan District and called for the plans and estimates of houses proposed to constructed on the three designs costing Rs.500/-, 800/- and 1,200/- which would suit the particular locality. A provision of Rs.4,000/- and Rs.2,000/- respectively has also been made for the purpose in the budget allotment for the current year.

The marginally noted villages have been selected by the Kadur District Committee in which the sanctioned houses have to be constructed at the cost noted against each and it has been decided by the Hassan District Committee that as the funds sanctioned for the purpose are not sufficient to construct all the three model houses of such designs and accommodation as would suit the local requirements and --- attract purchasers, the construction of one house at a cost of Rs.1,500/- be undertaken in the first instance at Mallipatna and with the balance of the sanctioned allotment and the realisations of the cost of the first houses, the second house at a cost of Rs.1,020/-be constructed in the Nidigere village.

1.Attigundi....	Rs.1,200/-
2.Gonibidu.....	" 500/-
3.Balehonnur	" 800/-
4.Lukvalli ...	" 800/-
5.Narve.....	" 500/-

It may be noted here that several villagers are coming forward to apply for houses on the hire-purchase system and a proposal has accordingly been submitted to

Government to enable the Committee to undertake the construc-tion of as many houses as are applied for under the Malnad Improvement Scheme and [redacted] to sell them to private individua on reasonable terms under the hire-purchase system. The Orders of Government with necessary funds for the purpose are awaited.

13. Sanitary Survey:

On instructi[redacted]d from this Office, the Overse[redacted] are conducting the survey [redacted], collecting information regarding the villages as to their sanitary conditi[redacted] together with particulars of improvements required, etc. In doing so, the villagers are freely consulted and departmental opinion wherever necessary is obtained. The Survey has been conducted till now in 45 villages in the Kadur District and 26 in the Hassan District.

14. Malarial Survey:

A Survey called " The Disease Survey " is being conducted by the Special and District Sanitary Officers of Hassan and Kadur Districts respectively and needful instructions in the matter were issued to them by the Sanitary Commissioner. Both these Officers have selected typical Malnad villages in each District as noted in the margin, and the Special Sanitary Officer, Saklespur intimates that he has already completed the Survey in five villages of the Manjarabad Taluk. The Kadur District Sanitary Officer [redacted] having been engaged on inoculation work in the Plague infected parts of Kadur, Tarikere and Chikmagalur Taluks almost during the whole of the half year under report, has not commenced the survey yet in any of the villages selected by him. He has however assured the Committee that he would attend to this work as early as practicable. The reports

Hassan District:
1.Halasulige, 2.Iswarahalli, 3.Hulhalli, 4.Kurubathur, 5.Chowlegere, 6.Utpathanahalli.
Kadur District:
1.Indavara, 2.Havalli, 3.Bettadamane, 4.Kelagodu, 5.Bintaravalli, 6.Hariharpur, 7.Siragalalu, 8.Danivasa, 9.Duglapura, 10.Lukvalli, 11. Lingadahalli & 12.Sakrepatna.

of the survey will, in due course, be sent to the Sanitary Commissioner for review.

15. Registration of Vital Statistics:

The revised system recommended by the Special Committee deputed for introducing improved methods for taking -- Vital Statistics and sanctioned in Government Order No.1025-75/San.75-13-23,dated 5th August 1915 has not yet been introduced on account of the non-receipt of the printed revised forms and registers. The Superintendent of Government Press is said to have intimated that the forms are still in the Press. Until the new system is brought into vogue, generalisations of any kind from the existing village Birth Registers are apt to be un-realiable and misleading. Though deaths are entered more or less correctly in the accounts, all births in a village are not entered as they occur. The causes of death are very often shown as fever (Chali-jvara) in a particular village and the Sanitary Officer who inspects the village to find a high splenetic index very often comes across not more than two or three children with slightly developed spleens, the rest of the population --- appearing in the best of health. The improved method of registering Vital Statistics will, it is hoped, secure accurate information.

II. Medical Relief:

16.Dispensaries:

Two Itinerant Dispensaries were sanctioned to the Hassan District in GovT: Proceedings No.184-9/Med.38-13-10, dated 8th July 1915, but orders were subsequently passed in Proceedings No.6120-6/San.52-15-11,dated 18th February 1916 that only one of the two dispensaries be started at once. A dispensary was accordingly opened at Bellur in the Manjarabad Taluk on the 12th June 1916 and has already become very popular. The number of cases treated in the dispensary during the half year is reported to be about 7,000 thus

giving a daily average of over 65. Of the several diseases treated, malaria gives the highest percentage of 45 and digestive complaints and skin diseases 16 and 11 respectively, the remaining 28 per cent being accounted for by diseases of other kinds. Recommendation for the sanction ~~of~~ to opening the second dispensary at Cheekanahalli, Belur Taluk, has been submitted and the orders of Government are awaited.

Service Branch Diary
Dt. 18-2-20.
4443-5
Med 18-12-4 9/17/1/17

The Kadur District Committee were all along in favour of stationary dispensaries and on their recommendation, the Government were pleased to sanction the establishment of five Stationary dispensaries at Aldur, Attigundi, Balur, Santaver and Balehonnur from the first December 1916 in Government Proceedings No.3206-8/Med.40-15-38,dated 22nd November 1916. The Senior Surgeon is making arrangements to select and appoint ~~xxxxxxx~~ Sub Assistant Surgeons for these dispensaries. ~~xxx~~ Medicines and furniture have already been received and temporary buildings secured for the dispensaries and staff in all these places. The inhabitants of these localities as also the European Planters of Balur and Santaveri have come forward with offers to put up permanent buildings at their own cost for the dispensaries in their respective places.

17. Free Distribution of Quinine:

During the half year under report, 20,000 5 grs. ~~xx~~ tabloids and an equal number of 2 gr. pills were got from the Medical Stores, Bangalore, and were freely distributed throughout the Malnad tracts of both the Kadur and Hassan Districts. The total quantity of quinine thus distributed since the inception of the Scheme in Kadur and Hassan Districts is given in the margin.

	Kadur.	Hassan.
5 grs.Powder Packets	30,000	17,442.
5 grs. tabloids.....	1009000	60,000.
2 grs. ----do----	12,000	8,000.
Sulphus(Powder).....	5 lbs.	-----

It may be noted here that the popularity of the drug has become ~~xx~~ great and its erficacy --- accepted by the Malnad population. As some of the Coffee Estate owners in Kadur and Hassan Districts offered to purchase quinine for the use of their coolies and dependents

On the proposal of the Committees, Government sanctioned in their Order No.3295-7/Med.45-16-2,dated 23rd November 1916 that the drug may be sold to private persons for the bona-fide use of themselves, their coolies or dependents at prices to be ascertained from the Medical Stores from time to time.

18. Vaccination:

The vacancy of the post of a Special Vaccinator in the Manjarabad Taluk was filled up during November 1916. Thus the number of Vaccinators that were employed and at work during the period under report is 4 and 3 respectively in the Hassan and Kadur Districts. Of the three vaccinators in the Kadur District, one was absent for more than two months on leave on Medical Certificate and so the number of vaccinators that were practically at work during the major portion of the period was 3 and 2 in the Hassan and Kadur Districts. The number of cases conducted by these vaccinators during the period is 822 and 402 in the Kadur and Hassan Districts and it is reported that 94 per cent of the cases were successful. Neither of the Special and District Sanitary Officers of Hassan and Kadur found any defects in the quality of lymph supplied by the Vaccine Institute.

19. Midwives and Nurses:

Two midwives were employed in the Hassan District and a third was also entertained quite recently during November 1916 and posted to Nagenahalli, Arehalli Hobli, Belur Taluk Report as to her having joined duty has not, however, been received. In additiona to five midwives employed already in the Kadur District, the employment of one more, who returned after training, has been sanctioned and it is propose to attach her to the newly sanctioned dispensary at Balur and orders will issue to her as soon as the dispensary is started. The total number of cases attended to by these Special Midwives in the two districts of Hassan and Kadur during the period under report is 29 and 36 respectively.

20. Maternities:

The District Committees of Hassan and Kadur pro-

proposed to have maternities established at Saklespur, Koppa and Mudigere as also to convert the existing Female Dispensary at Chikmagalur into a maternity and necessary recommendations for the same were duly submitted to Government who ordered that as the general scheme of increasing and establishing maternities were engaging the attention of Govt the question may for the present be dropped.

21. Special Grant to Medical Aid:

A special grant of Rs.30/- per mensem to Mrs.Slater's Dispensary for Women and Children at Chikmagalur was sanctioned for the current year also, as the Institution is reported to be doing much useful work in affording medical relief to the people. No such grant was sanctioned to any institution in the Hassan District.

III. E d u c a t i o n:

22. Spread of knowledge on Sanitary matters etc.

(a). Distribution of leaflets, etc.

The four leaflets, two in English and two in Kannada, brought out by Mr. M.G. Samuel, on " Quinine in the Treatment of Malaria " and " Small-pox and Vaccination " were further distributed by the Staff under the Scheme throughout the Malnad parts of both the Districts. Some pamphlets written by the Head Master, A.V. School, Chikmagalur,(Mr. Sampathiengar) and the Malnad Improvement Overseer, Saklespur, on general Sanitation, construction of model Sanitary houses etc., did not meet with the Sanitary Commissioner on the ground of their being, either too general or too voluminous. Hence, no fresh leaflets were either printed or distributed in the two districts during the period under report.

(b). Itinerant Lecturers:

No separate lecturer was employed under the Scheme in either of the Districts of Hassan and Kadur. Hitherto, the Executive Staff of the Scheme as also the Special and District Sanitary Officers of the respective districts wer

attending lecturing work. The services of the lecturers employed under the Mysore Economic Conference in the Distri were also being freely availed of. To organise ~~the~~ a system of regular lectures, however, the Committees of Hassan and Kadur, recommended to Government for the appointment of one Itinerant lecturer for each district. But the suggestion did not meet with the approval of Government ~~as~~ and General Secretary's letter No.4192/San.23-16-13, dated 4th January 191 stated that the proposal did not commend itself to Governmen as the question of imparting instructions to the public by means of lectures is engaging the attention of Government separately.

Proposal to open Industries in Narasimharajapura Taluk Sec 114-23-1192-1-17

23. Industrial Schools:

The Industrial School recently sanctioned at Chikmagalur has just been started and arrangements are being made to equip the institution with staff etc., by the Industries and Commence Committee of the Economic Conference. The Carpentry Class which opened as an adjunct to the High --- School at Chikmagalur has been ordered to be merged in the Industrial School and as such it has ceased to be an independent institution. Knitting and rattan working have been proposed to be introduced into the Local girls' School at Chikmagalur and arrangements are being made for instructions in tailoring and carpentry being given in the A.V. School at Tarikere. Arrangements are also being made to open an Industrial School at Narasimharajapur and the people have consented to provide funds for the purpose to the extent of half the cost.

In the Hassan District the carpentry classes opened in Belur, Saklespur and Alur as part ofthe Local A.V.Schools as also the Tailoring Classes in the Alur and Belur Hindustani Schools are reported to be working fairly well. The Weaving Class newly sanctioned to Togaranahalli, Alur Sub Taluk, has not yet been started for want of a competent teacher. A Weaving School has also been started at Mallipatna, in the Arkalgud Taluk.

24. Better Regulation of Physical exercise in Schools:

As the Education Department is devoting attention to this matter, no action was taken by the Malnad Improvement Committees.

25. Special Scholarships:

About half a dozen applications which were received last Year from students of the Malnad parts of the Kadur District were recommended to Government for grant of suitable scholarships to enable them to study in College classes. No action seems to have been taken in the matter and none of the applicants appear to have received any scholarships on the special consideration of their being Malnad pupils. So the Committee ordered that such students should in future be directed to apply to the Inspector General of Education and accordingly they were all directed to approach the Inspector General direct. A reference was also made to Govern ment bringing to notice all the above facts and a proposal was submitted for a separate amount being placed at the disposal of the Committees to grant these scholarships to deserving candidates. The matter is under consideration and orders of Government.

IV. Development of Industries:

26. The question of the establishment of a tile factory, a saw mill and works of charcoal burning at Narasimharajapur was the Kadur District Committee who were asked to develop and formulate definite proposals for establishing the industries by inducing the local people to interest themselves in the matter. A meeting of the Town's people was accordingly convened in November last at Narasimharajapura and the -- leading rypts and merchants expressed their willingness to contribute to an extent of Rs.10,000/- for the purpose of establishing a Tile Factory and a Saw mill on condition that the Government gave the rest of the funds necessary to open the two industries. The matter was accordingly brought before the Committee at their meeting in November 1916 who decided

tion of the District Committee of the Economic Conference where the same could better and more appropriately be considered and it is accordingly engaging the attention of that Committee. In Chikmagalur Town, a paddy-huller has very recently been started and this and a furniture shop and three factories for manufacturing country carts are all reported to be working very satisfactorily. Of late, a small Printing press has also been started. In a village near Narasimharajapur, another paddy-huller has been installed and the proprietor intends to open a saw mill as well. Needful advice and instructions are being given to him. The manufacture of furniture and other wood work in Tarikere and Narasimharajapur and the manufacture of native shoes and chadavoos are some of the thriving industries in the Kadur District. The silk-weaving concern at Chikmagalur, soap factories at Aldur and Sringeri and the tile works and the oil mill at Sringeri are not reported to be very flourishing for want of encouragement and support. The Harmonium Factory at Tarikere is stated to have closed work on account of difficulty in obtaining the reeds during the present War.

In the Malnad parts of the Hassan District, no big industrial concerns have yet been started, but the rice mill established on a small scale at Alur is reported to be working satisfactorily. The starting of similar factories in Belur, Mallipatna and Balu villages and a tile factory at Saklespur are engaging the attention of the District Economic Committee. The Pumping Installation in Kannaikanhalli, Belur Taluk, has been taken up for investigation and necessary steps will be taken to consult the Departments of Industries and Commerce in the matter.

V. Improvement of Agriculture:

27. Endeavours are being made to open demonstration and experimental farms in the Kadur and Hassan Districts and private persons are being induced to undertake the business

themselves. Three applications were received from the Koppa Taluk and two from the Manjarabad Taluk applying for free grant of seeds, etc. The petitioners stated that they would place their own land for the purpose and agreed to plant any kind of seeds either sugar cane or pulses or paddy. The District Committees ordered that the applicants be referred to the Agricultural section of the District Economic Committee where they are now under disposal. The advantages of cultivating foreign varieties of sugar cane and paddy have been made known to the people in the two districts.

28. Facilities for grazing etc.

An earnest attempt is being made to enquire into these matters in the villages of both the districts. In the case of four villages in the Kadur District and two in the Hassan District steps have been taken to afford additional facilities for grazing purposes and recommendations have also been made to the Deputy Commissioners for getting the neighbouring assessed waste and other lands converted into the village gomal.

29. Establishment of Veterinary Dispensaries:

There is at present only one Veterinary dispensary in each of the districts of Kadur and Hassan located at the Head Quarters of the Districts, Chikmagalur and Hassan. During the period under report, cattle diseases of a severe type prevailed in the Kadur District and carried away thousands of cattle. The economic loss to the country by the death of these cattle is roughly estimated to be Rs.2,00.000/ It is therefore considered very desirable to establish Veterinary dispensaries at Koppa, Mudigere and Saklespur.

VI. Improvement of the Economic Condition:

30. Co-operative Societies:

Four new societies were started during the half year in the Kadur District, one in each of the villages of Malalur and Hosahallipet and two in Chikmagalur Town. The total number of societies which were actually working till the end of December 1916 in the Malnad tracts of the two districts

of Hassan and Kadur is 23 and 29 respectively.

31. Debt Survey:

Although the Committees have not yet decided the exa lines on which a debt survey in the villages should be made an attempt to get a rough idea of the indebtedness of the marginally noted village in the Hassan district was made. The data so far collected will be placed before the Committee for its consideration and the Registrar of Co operative Societies in Mysore will also be consulted as to what steps should be taken to ease the financial condition.

1.Malali, 2.Halliuru, 3.Palahalli, 4.Balehalli, 5.Yettehalli, 6.Bettekumari and 7.Yedekumari.

32. Land ~~Mortgage~~ Mortgage Bank.

The Registrar of Co-operative Societies in Mysore w consulted regarding the establishment of a Land Mortgage Bank in the Malnad to afford relief to the indebted ryots. The question was discussed at the meeting of the Central Committee and a Scheme for establishing a Land Mortgage Ba was framed and it is receiving the attention of Government

33. Recruitment of Labor:

Next in importance to the question of agricultural indebtedness in the Malnad is the growing shortage of labo for carrying on the agricultural operations even in the ex ting arecanut gardens and paddy fields. Paucity of labor in the Malnad has been felt during the past 20 years and as a solution of the problem is beset with very great diff culties, things have been allowed to drift. It is keenly felt, however, that the time has arrived for devising a scheme for recruiting labor to meet the requirements of th arecanur garden owners. With this object, the Central Com mittee at its meeting held on the 23rd September 1916 con- sidred a scheme drawn up by the Secretary of the Central C mittee and another scheme by Mr. Hosakoppa Krishna Rao. Th schemes were however referred to a Sub Committee who findi the two schemes very expensive drew up a less costly schem and ordered it to be placed before the Central Committee a its next meeting.

(13

34. Economic Survey:

Beyond carrying out the debt survey in some of the villages, no separate economic survey was made, the Committee intending to ask the Registrar of Co-operative Societies in Mysore for his advice in the matter.

VII. M i s c e l l a n e o u s:

35. Attraction of Settlers:

87 [redacted] families have till now come and settled themselves in several villages of the Kadur District as noted in the margin and some 15 families are expected to come and settle in the Manjarabad Taluk as soon as the question of their lands is settled. A sum of Rs.200/- has been advanced to four families in the Kadur District and 10 more applications for advances are pending disposal. No advance has yet been given in the Hassan District. Out of 36 applications received for grant of lands in the Kadur District, 4 were finally disposed of and the remaining applications are under disposal. The three applications received from the people in the Hassan District were submitted to the Deputy Commissioner and Chairman with necessary recommendations. Every attempt is being made to give full effect to the scheme of attracting settlers into the Malnad by way of granting favourable concessions sanctioned, with as promptitude as possible.

Haravanhalli, Tarikere Tk — 18

Kambikal-halli — 12
Sangames-warpet — 6
Kusaballakki & Vastara — 30
of the Chickmagalur Taluk — 6

36. Expansion of Communications:

The United Malnad Motor Service Company have been regularly running a motor bus with 32 seats from Chikmagalur to Kadur. The Company is purely a private organisation -- [redacted] and giving great satisfaction. A smaller car is also run by the above company to carry mails and passengers from Chikmagalur to Mudigere a distance of 19 miles. A similar service has also been started by some leading and wealthy persons of Koppa from Tarikere to Koppa and the same has been working fairly well. The train connection from Chikmagalur to Kadur and Chikmagalur to Hassan via Belur is engaging the attention of Govt

Government and the District Board have already commenced levying a cess of half an anna in the rupee. The Tramway from Tarikere to Narasimharajapur is almost complete and it is contemplated to extend it to Hebbe and Sringeri.

The progress of 11 road and bridge works sanctioned from time to time and carried out under the Scheme by way of improvement to several village roads is shown in detail in the accompanying statement.

In the Hassan District, in addition to the road work sanctioned and executed during last year. a portion of another work viz. road from Mallipatna to Konanur has been undertaken during the current half year to the extent of Rs.500/- against the estimated cost of the entire road viz., Rs.1280/-. Some ten more road works estimated to cost about Rs.8,000/- were placed before the District Committee who ordered that necessary application be made to Government for the requisite funds.

37. Increase of population in some villages notwithstanding general decline:

This question has been taken up for investigation and the collection of necessary statistics is being attended to by the Overseers of the Department in some typical villages, The procedure adopted being the actual counting of the number of people in each village. Till now such statistics have been collected in 8 villages in the Hassan District and 12 in the Kadur District.

38. Periods of the year in which deaths are most numerous:

In the last Half Yearly Report, the periods of the year during which certain diseases prevailed and deaths were notably numerous were discussed and the conclusions drawn were fully borne out by statistics obtained from the several dispensaries. No further investigation in regard to this matter was possible as the months covered by the report were fairly healthy.

39. Suitability of Bagani toddy as a drink:

Further enquiries regarding the wholesomeness of thi

this toddy as a drink or food have elicited various opinion While some say that it is both a drink and food to the Malna ryot, certain others hold quite a contrary opinion that it is neithe a wholesome drink nor a suitable food. On the otherhand the gowda owners of Bagani toddy trees seem to be strongly of opinion that the toddy as drawn from the tree is an innocuous juice with a large quantity of water and some saccharine substances and hardly possesses sufficient intoxicating properties to be acceptable to people of drinking tendencies. It is also asserted that the Bagani toddy which is sold and consumed largely is a stuff which has been heavily drugged with opium and certain herbs abd roots. It is also said seriously that the potation so made is stirred up with a certain serpent's tooth, thereby giving it peculiarly stron intoxicating effects. This method of preparing Bagani toddy was given by certain enthusiastic yet very respectable members of the anti-drinking movement whi is putting forth its best endeavours to put down drunkenness in the Malnad. All the same, it appears to be necessary to accept with caution the oft-quoted opinion that the Bagani toddy is both a food and a comparatively harmless drink to the people of the Malnad. Rheumatism among the inveterate drinkers of Bagani toddy is said to be a common complaint.

42. Effects of expansion of Forest Areas:

Although Forest expansion has not caused serious inconveniences on the majority of villagers in the Malnad, yet it is reported that in some villages in the Arkalgud and Mudigere Taluks, forests seem to have been brought too near the village limits thereby curtailing the grazing areas in the villages to a great exten As only four or five cases have been brought to the -- notice of the Special Revenue Officer, it seems possible that these stray and individual cases may be attended to without much difficulty.

41. Taking frequent Census in the Malnad:

The question engaged the attention of the Central C mittee and was well discussed at its meetings. The proposa based on its resolutions to the effect, that Census should b taken at least once in six months was submitted to Government for considerations and orders. The matter is now said to be under correspondence between Government and the Secre tary, Central Committee.

42. Susceptability of Special class of people to premature loss of vitality:

The Executive staff of the Department have been aske to make local enquiries regarding the matter and to collect necessary statistics and information which might help in th investigation of the subject.

CHAPTER VIII. Expenditure during the Half year:

43. In addition to the establishment charges in both the Districts, a sum of Rs.2344/- was spent on works in the Kad District. Most of the newly sanctioned works in both the Districts were put on hand and the incomplete works of the previous years re-started only during December 1916,, as the monsoon which commenced this year rather un-usually early continued till about the middle of November 1916 .

In the Hassan District, several works were also started and uniform progress was maintained throughout the period under report.

It may not be out of place to mention here that owing to the peculiar condition of the Malnad portions of the Hassan District, the progress of the well and other works during the first half of the year is hampered by a variety of causes. Almost all the works have to be given to South Canara Beri Contractors who generally come up only in November, local labour being either not available or inexperienced in deep well works. Then as already stated, it is generally not found possible to start the works earlier than December as the soil retains a vast amount of moisture and water is tapped within 10 to 15 feet

(23

necessitating the baling of water and suspension of sinking work for some days, by which time the month of December close rapidly, leaving a number of wells sunk to a depth of only 15 to 20 feet. In several instances, local labour was given ample technical help and tried, but unfortunately, it failed to -- come up to expectations and works had to be given over to th trained South Canara well-diggers . Lastly, for nearly 60 well works, two road works, 20 drainage works and about 30 village extension schemes spread over the Taluks of Arkalgud Hanjarabad, Belur and Alur, there is only one Overseer in direct charge of them all, the sub-Overseer stationed at -- Belur being new to works of this kind. It was in these circumstances, representations were made more than once that in the place of Sub-Overseers who had undergone training in mere Sanitation, persons who had experience in engineering or sub-ordinates of the Public Works Department should be employed. As the Deputy Commissioners of Kadur and Hassan have strongly supported the above recommendation, it is hoped that favourable orders will issue from Government on the subject.

P Ramaswamy Rao

Special Revenue Officer,

M.I.S.Kadur & Hassan Districts.
